Ideation Phase
Define the Problem Statements

Date	06 July 2026
Team ID	
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

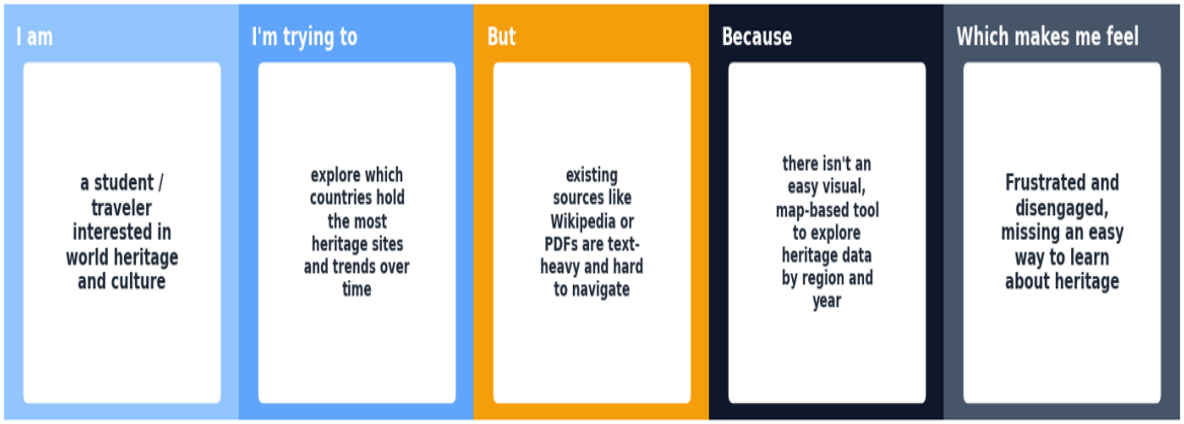

Customer Problem Statement Template:

A problem statement was created to understand the point of view of two key customer types for the UNESCO World Heritage Sites dashboard project, helping the team focus on what matters most and empathize with how each customer perceives the challenge of exploring heritage data today.

PS-1

PS-2

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A heritage conservation researcher analyzing UNESCO site data	Quickly identify which World Heritage Sites are most at risk and understand global site distribution	The raw UNESCO data is scattered across spreadsheets with no visual, regional, or yearly breakdown	There is no centralized interactive dashboard combining site counts, categories, danger status and trends	Overwhelmed, and unable to make timely, evidence-based conservation decisions
PS-2	A student or traveler interested in world heritage and cultural history	Explore which countries and regions hold the most heritage sites and see how listings have grown over time	Existing sources like Wikipedia or static PDF reports are text-heavy and hard to navigate	There isn't an easy-to-use, visual, map-based tool to explore heritage data by category, region and year	Frustrated and disengaged, missing an easy way to learn about global heritage
