Project Design Phase
Problem – Solution Fit Template

Date	06 July 2026
Team ID	
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that a problem has been identified for the customer and that the proposed solution actually solves that problem. It helps identify behavioral patterns and recognize what would work and why.

Purpose:

- Solve the complex problem of navigating scattered UNESCO heritage data in a way that fits how analysts and travelers already work.
- Increase adoption by delivering the dashboard through channels people already use — a shareable Tableau Public link and a simple web page.
- Sharpen communication with clear visuals (maps, trends, danger indicators) instead of raw spreadsheets.
- Increase touch-points by making the dashboard easy to revisit, share, and reference in reports or presentations.

Understand the existing situation (manual spreadsheet analysis) in order to improve it for the target group.
